

May 13, 2011

Dear Potential Participant,

Following a very successful event last year, the World Science Festival is happy to announce *From the City to the Stars: A Night of Star-gazing at Brooklyn Bridge Park* on Friday, June 3rd.

The World Science Festival is an annual five-day celebration of science that brings together many of the world's greatest minds in science, business, government, and the arts. It has featured more than 200 participants, including more than 20 Nobel laureates, and has attracted more than 300,000 people since its launch in 2008.

We are excited to bring together such a passionate group of astronomers and provide a forum to encourage the general public to learn more about the advances in space technology. This year's participants include Dr. Timothy Ferris (renowned science author, emeritus professor at the University of California, Berkeley, and fellow of the American Association for the Advancement of Science) and Dr. Charles Liu (director of The Verrazano School at CSI, professor at CUNY of Staten Island, and astrophysicist associate at the American Museum of Natural History).

We would be very happy to include you as one of our participants for *From the City to the Stars: A Night of Star-gazing at Brooklyn Bridge Park*. To ensure a safe, organized and fun evening of star-gazing please fill out the form below and send to dhodorowski@worldsciencefest.org **before** Tuesday, May 24th. As the date approaches, I will reach out to all participants with a welcome letter that shall include all the pertinent information for the event.

Thank you,

David Hodorowski
